Ms. Irene Stillings
Executive Director
San Diego Regional Energy Office
8520 Tech Way
San Diego, CA 92123

Dear Ms. Stillings,

Addressing regional energy issues is critical to the business community in Coronado and the economic stability of the region. The San Diego Regional Energy Infrastructure Study is a useful tool in the continuous resource planning efforts and the on-going discussion of how to meet the region's growing energy needs. The report reaffirms the assessment of most energy industry participants that the region needs more energy infrastructure in the future.

Your study indicates that it is clear that the San Diego region needs more transmission to deliver already contracted-for energy. San Diego Gas & Electric is addressing the need for additional energy transmission infrastructure through its proposal for the Valley-Rainbow Interconnect, yet this critical piece of infrastructure has not been included in your report. The Coronado Chamber of Commerce strongly urges you to support this urgently needed infrastructure project.

I hope that you will include this letter in your record. The Coronado Chamber of Commerce would like to join business organizations, labor organizations, and cities throughout the region in support of the Valley Rainbow Interconnect. At the Coronado Chamber of Commerce, planning for our regions energy future is essential. Our region's economic prosperity depends on it.

Sincerely,

Erin Gunder
Executive Director
Coronado Chamber of Commerce
